

GROUP	Current FlyBase symbol (FB2014_03)	Current FlyBase name (FB2014_03)	NEW symbol	NEW name	Notes
BCL2	<b>debcl</b>	death executioner Bcl-2 homologue	<b>Debcl</b>	Death executioner <b>Bcl-2</b> homologue	Capitalized initial letter to be consistent with other 'death genes' and FlyBase nomenclature rules
BCL2	<b>Buffy</b>	Buffy	-	-	
RHG	<b>rpr</b>	reaper	-	-	
RHG	<b>grim</b>	grim	-	-	
RHG	<b>W</b>	Wrinkled	<b>hid</b>	head involution <b>defective</b>	Changed symbol & name to reflect preferred usage in literature
RHG	<b>skl</b>	sickle	-	-	
RHG	<b>HtrA2</b>	HtrA2	-	HTRA2-related serine protease	Given more explicit fullname
RHG	<b>Jafrac2</b>	thioredoxin peroxidase 2	-	Thioredoxin peroxidase 2	Capitalized initial letter of fullname to be consistent with other 'death genes' and FlyBase nomenclature rules
IAP	<b>th</b>	thread	<b>Diap1</b>	Death-associated inhibitor of <b>apoptosis 1</b>	Changed symbol to reflect preferred usage in literature. Retro-fitted fullname to fit symbol without using 'Drosophila'.
IAP	<b>lap2</b>	Inhibitor of apoptosis 2	<b>Diap2</b>	Death-associated inhibitor of <b>apoptosis 2</b>	Changed symbol to reflect preferred usage in literature. Retro-fitted fullname to fit symbol without using 'Drosophila'.
IAP	<b>Bruce</b>	Bruce	-	BIR repeat containing ubiquitin-conjugating enzyme	Given more explicit fullname
IAP	<b>Det</b>	Deterin	-	-	

GROUP	Current FlyBase symbol (FB2014_03)	Current FlyBase name (FB2014_03)	NEW symbol	NEW name	Notes
APOPTOSOME	<b>Ark</b>	Apaf-1-related-killer	<b>Dark</b>	Death-associated <b>APAF1</b> -related killer	Changed symbol to reflect preferred usage in literature. Retro-fitted fullname to fit symbol without using 'Drosophila'.
CASPASE / APOPTOSOME	<b>Nc</b>	Nedd2-like caspase	<b>Dronc</b>	Death regulator <b>Nedd2</b> -like caspase	Changed symbol to reflect preferred usage in literature. Retro-fitted fullname to fit symbol without using 'Drosophila'.
CASPASE	<b>Ice</b>	Ice	<b>Drice</b>	Death related <b>ICE</b> -like caspase	Changed symbol to reflect preferred usage in literature. Retro-fitted fullname to fit symbol without using 'Drosophila'.
CASPASE	<b>Dcp-1</b>	Death caspase-1	-	-	
CASPASE	<b>Dredd</b>	Death related ced-3/Nedd2-like protein	-	Death related <b>ced-3/Nedd2</b> -like caspase	Changed 'protein' to 'caspase' in fullname to be more informative and consistent.
CASPASE	<b>decay</b>	death executioner caspase related to Apopain/Yama	<b>Decay</b>	Death executioner caspase related to Apopain/Yama	Capitalized initial letter to be consistent with other 'death genes' and FlyBase nomenclature rules
CASPASE	<b>Damm</b>	Death associated molecule related to Mch2	-	Death associated <b>molecule</b> related to <b>Mch2</b> caspase	Added 'caspase' to fullname to be more informative and consistent.
CASPASE	<b>dream</b>	dream	<b>Strica</b>	Ser/Thr-rich <b>caspase</b>	Changed symbol & name to reflect published precedence and preferred usage in literature
